

0-65 GPM Oil Filter/Flushing Cart at Grant County PUD's Priest Rapids Dam

This robust filtration system is one of two built for Grant County in WA state. It features a core-less Absolute Rated Micro-Glass Filter and a whisper quiet and easy to control 0-65 GPM flow rate. It also utilizes a direct reading differential pressure gauge, a dirty filter indication light, a UL Listed NEMA 4 control box and 6" polyurethane casters for portability.
